MEMORANDUM FOR THE NATIONAL FOREIGN INTELLIGENCE BOARD

SUBJECT: Nondisclosure Agreement for Sensitive Compartmented Information (SCI)

1. The Snepp case and subsequent discussions with the Department of Justice and Community legal counsel indicated that there are advantages from the Government's standpoint in protecting SCI to including in nondisclosure agreements a specific requirement for prepublication review of material related to SCI. Form 4193 was developed as a new nondisclosure agreement based on analysis of the Snepp case. It includes an explicit prepublication review requirement. That form may be used by the Community to satisfy the requirement for a nondisclosure agreement for SCI accesses.

2. Senior Intelligence Officers are encouraged to include a prepublication review requirement in any alternative form of nondisclosure agreement they use. Departments or agencies electing to use Form 4193 or to include a prepublication review requirement in their own form should use the same form without exception for all SCI accesses they grant.

3. Procedures on this subject will be incorporated into DCID 1/19.

William J. Casey
